

KAREMOPS.AI · FIELD GUIDE

Generate ads, carousels, and UGC videos **inside Claude.**

Higgs Field makes UGC video ads, product shots, carousels, and Meta creatives. Wire it to Claude via MCP and you never leave the chat to make a marketing asset again. 2-minute setup.

INSIDE

2-minute MCP setup · What Higgs Field ships out of the box · 5 prompts to run first · The ChatGPT combo that covers everything an agency would.

What this **actually** is.

Higgs Field is an AI video and image generator built for marketing — UGC ads, product shots, Instagram carousels, Meta creatives, brand kits. Connect it to Claude via MCP and Claude runs it for you.

Heads up. This is one connector, not a new app. Everything happens inside your Claude chat. No switching tabs, no re-uploading, no exporting from one tool to import into another.

What you can generate

- UGC-style video ads — 10, 20, 50 variations from one product photo
- Instagram carousels — each slide rendered as a designed image
- Meta ad creatives — sized and styled for Facebook + IG placements
- Product shots — lifestyle backgrounds, styled comps, e-com ready
- Brand kits — cohesive posts, story templates, ad variations in your style

Before you start

- Claude Pro or Team account (Free doesn't support custom connectors)
- A product photo or brand asset ready to upload
- 2 minutes

Gotcha. Custom connectors live under *Customize* → *Connectors* in Claude. If you don't see it, you're on the Free plan or in a workspace where admins have locked connectors down.

Create a Higgs Field account.

Free to start. You'll want to upload your product, logo, and any brand reference images now so Claude has them to pull from later.

higgsfield.com

What to upload while you're in there

- Your product photo (front-facing, clean background works best)
- Your logo (SVG or transparent PNG)
- 2–3 brand reference images — the vibe you want your ads to match
- A short brand description Claude can reference later

Do this now, not later. Every prompt you run in Claude will pull from these assets. If they're not uploaded, Claude generates generic content instead of on-brand content. This is the single biggest quality lever.

Copy the MCP link. Paste it into Claude.

This is the whole install. Two URLs, one save button.

Step 02 — Grab the MCP link

MCP CONNECTOR URL

```
https://higgsfield.ai/mcp
```

Step 03 — Add it to Claude

- 1 Open Claude. Click **Customize** (bottom left).
- 2 Go to **Connectors** → hit the **+** button.
- 3 Select **Add Custom Connector**.
- 4 Name it `Higgs Field`. Paste the MCP link above.
- 5 Hit **Save**. Authorize the connector when Claude asks.

If it acts dead the first time, type `Use Higgs Field` in your chat. That flips Claude into using the connector for real instead of guessing. From then on it's automatic.

5 prompts to run first.

Upload your product photo in the chat first. Then paste any of these. Claude does the rest.

UGC video ads

Here's my product [upload photo].
Create 10 UGC-style video ads showing it in
different lifestyle settings.

Instagram carousel

Make a 5-slide Instagram carousel about
[YOUR TOPIC]. Clean modern design, bold
headlines, one idea per slide.

Meta ad variations

Generate 5 Meta ad variations for my [PRODUCT].
Target audience: [AUDIENCE].
Highlight: [KEY BENEFIT].

Product shots

Take this product photo and create 8 different
lifestyle shots with varied backgrounds.

Mini brand kit

Build a mini brand kit: 3 social posts,
2 story templates, 1 ad creative.
Brand colors: [HEX CODES].

The combo that covers everything. Use Higgs Field for video ads + UGC content, and ChatGPT's image model for static carousels and ad creatives. Between the two, you're producing what a full agency creative team would produce — from a chat window.

That's the whole thing.

Higgs Field account. MCP link. One custom connector in Claude. Upload a product and ask Claude to make you 10 ads. You'll see why this changes everything.

The workflow now

Open Claude. Drop a product photo. Ask for 20 UGC video ads across 4 hooks. Wait. Post the best ones. Repeat for carousels, Meta creatives, brand kits. No app-switching. No handoffs. One chat window → a week of creative.

Share it forward. If this saved you a few hours, send it to one other founder who's still opening 6 tabs to make a single ad.
